

DHMO SYSTEMS

Effortless. **Automated.** Intelligent.

24/7

Live Monitoring

Real-time pH, ORP, salinity & temp — 24 hours a day.

100%

Australian Made

Designed, engineered & manufactured in Australia.

48hr

Chemical Delivery

Order in-app. Delivered to your door fast.

1 App

Total Control

Monitor & manage your pool from anywhere.

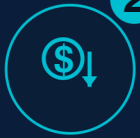

DOES THIS SOUND FAMILIAR?

1

Testing & Guesswork

You test, head to the pool shop, get generic advice — and repeat every week. Time-consuming, expensive and inconsistent.

2

Wasting Chemicals & Money

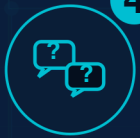

Without precise data most owners over-dose. You spend money your pool didn't need, creating imbalance that costs even more to fix.

3

Waiting for Your Next Service Visit

Something's off but your technician is weeks away. Your pool can go from slightly out to genuinely problematic in that time.

4

Confusing, Conflicting Advice

Pool shops, technicians, YouTube — everyone says something different. Without live data from your pool, it's impossible to know who to trust.

THERE IS A BETTER WAY

DHMO Systems gives you live, real-time intelligence — 24/7.

No guesswork. No waste. No surprises.

How DHMO Systems Works

From installation to crystal clear water — here is the complete DHMO journey.

1
INSTALL

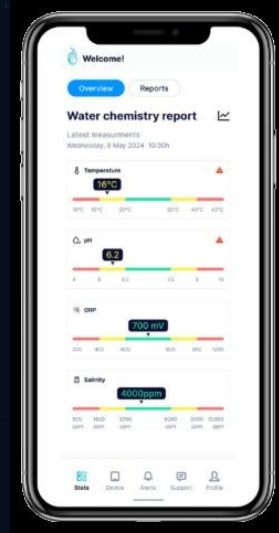

Our DHMO Certified tech installs the unit & sensors onto your pool. Compact, discreet. Under 2 hours you are up & running.

2
MONITOR

DHMO reads pH, salinity, ORP & temp 24/7 — streaming live to the DHMO app. Smart recommendations at your fingertips.

3
BALANCE

Parameters out of range? Push alert sent to your phone. A.I. calculates exact dosing for your pool size ensuring you add only what you need.

pH **pH Level**

Keeps your pool water balanced so it's comfortable to swim in and allows chlorine to work effectively.

ORP **ORP**

Measures the sanitising power of your water, helping ensure bacteria and contaminants are properly controlled.

SAL **Salinity**

Maintains the right salt or mineral levels so your chlorinator runs efficiently and your water feels softer on skin and eyes.

TEMP **Water Temp**

Helps maintain swimmer comfort while also influencing chemical effectiveness and algae growth.

Everything Your Pool Needs. Nothing It Doesn't.

Spend more time enjoying your pool - less time wondering what to do next

Live Monitoring

Real-time data on pH, ORP, salinity and temperature — directly to your phone every minute of every day. No guesswork necessary.

Instant Alerts

Automated algorithms understand water balance. Once water chemistry drifts outside optimal ranges, you receive a push notification. Fix issues before they become costly problems.

Smart Chemistry

Precise dosing guidance based on live readings from your specific pool. Add exactly what you need — nothing more. Eliminate over-treatment and waste for good.

One App

Monitor, manage and track everything from anywhere in the world. iOS and Android. Your pool's full history at your fingertips.

Order In-App

Need minerals before the weekend? Order exactly what your pool requires directly through the DHMO app. Delivered to your door within 48 hours. No pool shop runs required.

Save Money

Stop buying chemicals you don't need. DHMO customers consistently report 40–60% reductions in chemical spend — adding only what their pool actually needs.

Your Pool In Your Pocket

Complete visibility and control of your pool from any where in the world iOS and Android.

URGENT ALERTS

REAL-TIME DATA

Everything in One Place

■ Live Dashboard

Real-time readings for all water chemistry parameters displayed in one clean, easy-to-read dashboard.

■ Push Notifications

Instant alerts sent directly to your phone the moment any reading moves outside your optimal range.

■ History & Trends

Full chemical history and trend graphs so you can see exactly how your pool performs over time. Pool warranty documents, service records and water test history can all be stored securely in-app.

■ In-App Shop

Order exactly the chemicals your pool needs, delivered to your door in 48 hours. No pool shop needed.

■ Lifetime App Support

Your DHMO app is continuously updated with new features. App support is included for the lifetime of your system.
